

Concerned parent: If all your friends jumped off a bridge would you follow them?

Machine learning algorithm: **Yes.**

You thought that was **funny?**

Perfect! We've got the right **Job** for you!

Who are we?

ambeRoad is an Aachen based Start-Up focused on Business Intelligence. We are applying state-of-the art natural language processing and other machine learning techniques for intelligent search reranking, with a focus on company internal search tools.

What are we looking for?

- Long term experience with **Python** or **C#**
- Skills in **Linux Bash** or **Windows Server Administration**
- Involvement in other large projects, especially with **GIT**
- Not mandatory but good to have: Practice of **NLP** in **Tensorflow**, **Pytorch**

Your Responsibility

For our latest project we are looking for support in our

DevOps Team.

Your task will be the development and integration of modules as well as the preparation for their open-source integration. We are looking for 12-19 hours per week.

What do we bring to the table?

- ✓ **Above average** pay (15-17 € / hour)
- ✓ **Credits** for Google Cloud even for private projects (GPU and TPU cluster access)
- ✓ Working in the **Digital Church Aachen**
- ✓ Participation in **Open-Source projects**
- ✓ Rapid **promotions** possible
- ✓ **Signing Bonus** of up to 500 €

Sounds Interesting to you?

We do not need your CV, just write down some key points about your coolest project and why you would love to work for a startup company and send it to:

the-next-jeff-dean@amberoad.de

Or recommend someone you know and earn **100 €** if we hire them.
